## Cement Safety Protect Your Skin and Eyes

Cement (wet or dry) is Caustic to your skin and eyes. It can cause burns, rashes, and irritations. Protect your skin and eyes by doing the following:

- Protect your hands with well-fitted gloves when mixing and applying. Avoid allowing cement to enter inside the glove.
- Do not use cotton or leather gloves. Use butyl, nitrile, or other approved glove. Refer to the cement material safety data sheet (MSDS) for selecting proper glove.
- Avoid allowing cement to saturate your gloves and clothing. Wash contaminated gloves and clothing and allow gloves and clothing to dry before using.
- Wear approved eye protection at all times.
- Wash your hands and other skin area that has come into contact with the cement.

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured's property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.
