## **Stairway Safety Stairway Design Features**

Minimize the danger of slipping, tripping or falling on steps by doing the following:

- Provide sturdy handrail and guardrail systems. Protect the open sides of steps with a handrail and guardrail system.
- Maintain non-slip surfaces on treading and nosing. Apply friction strips or commercial coatings with a high friction value to step surfaces.

- Provide adequate illumination of the stairway area.
- Mark all changes in elevation. Use contrasting colors to highlight the top and bottom stairs and stair edges.
- Maintain steps in good condition. Repair or replace loose or worn treads or coverings.

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured's property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.
