

Instructions: Use this form when conducting an accident investigation to identify specific causes of injuries/crashes/incidents. The investigation is a fact-finding process versus faultfinding. Using "carelessness" as a cause is not acceptable. There has to be a cause and this guide should help you in making that determination. Identify the cause and action taken on the accident report.

CAUSAL FACTORS AND POSSIBLE CORRECTIVE ACTIONS

Hazardous Condition as a contributing factor		Environment as a contributing factor	
Defect in equipment	Review procedure for inspecting, reporting, maintaining, repairing, replacing or recalling effective equipment/tool/material used.	Location/position of equip/ material/employee contributed to hazardous	Perform job safety analysis. Review job procedures. Change location or positions.
Hazardous conditionnot recognized	Perform job safety analysis. Improve ability of employee to recognize existing or potential hazard/hazards.	condition Hazardous condition notrecognized	Improve employee ability to recognize existing or potential hazardous condition.
Hazardous conditionnot reported	Train employees in reporting procedures. Stress individual acceptance of responsibility.	C	Review procedures for hazard avoidance and review supervisory responsibility. Improve employee communication.
Employee not informed of hazardous condition and the job procedures	Review job procedures for hazard avoidance. Review supervisory responsibility. Improve supervisor-employee	Hazardous condition notreported	Train employees in reporting hazardous conditions. Stress employee responsibility.
	communications. Develop and adopt procedures to detect	Employee not informed of procedures for dealing with hazardous condition	Improve supervisor communications. job Review job procedures with employees for handling hazardous conditions.
procedure to detect the hazardous condition	hazardous conditions.	the vicinity of the	Review job procedures and instruction. be in Provide guardrails, barricades, signs or
material used	Specify what should be used on the job and train employee on the correct use.	equipment/material Hazardous condition created	signals Change the layout to provide increased by
Correct equipment/tool/ material not readily available	Provide/order correct supplies. Review purchasing specifications and procedures.	the location/position of equip or material visible to employee	visibility. Provide appropriate barriers.
	Plan and anticipate before assigning activities.	Insufficient workspace	Review workspace requirements, modify as required.
Employee unsure where to obtain required equip/tool/	Review procedures with employees for locating and obtaining equipment/tools/materials.	Environmental conditions contributing factor. (air contaminants, noise, heat, vibration, ventilation)	Monitor, or periodically check conditions. a Take action to initiate immediate action if conditions are found to be unacceptable or hazardous
Substitute equipment/tool/ material used in place of correct one	Provide correct supplies. Warn against using substitutes.		
Design of equipment/tool creates operator error	Review purchasing and specifications. Check out new equipment and job procedures. Encourage employees to report potential hazardous conditions caused by equipment design.		
General design or quality of -	Review criteria in codes, standards, the

to a hazardous condition

Other causal factors: ___

specifications,

People as a contributing factor

No written or known procedure ----Develop safe job procedure and train for the task/job employees Job procedures did not anticipate ---Perform job safety analysis and change the factors that contributed to the job procedures. accident Employees did not know the -----Improve job procedure training/instruction/communication. Employee deviated from known ---- Determine why. Encourage employees to and accepted job procedures report problems with an established procedure. Review and modify if necessary. Counsel or discipline as required. Provide closer supervision. Employee not physically or -----Review requirements for the job. Take appropriate action through Personnel to mentally capable of performing the job modify the job requirements or remove the employee from that position. Tasks in job procedure too -----Review job design and procedures. difficult to perform (such as physical demands or technical) Job structure encourages or -----Change job design and procedures requires deviation from job procedures **Personal Protective Equipment (PPE)** Appropriate PPE not specified ----Review DOT procedures for required PPE for the task/job Appropriate PPE not available ----Provide appropriate PPE. Contact Loss Control Department for PPE specifications Employee was not aware that -----Improve job instruction and communication PPE was required PPE was/is not being used ------Determine why and take appropriate action to include disciplinary action if properly or was not used properly when an injury appropriate. Implement procedures to monitor and enforce use of PPE. occurred PPE not adequate -----Review PPE requirements. Contact the Loss

Control Department for guidance.

Emergency equipment not -----Install emergency equipment.

Emergency equipment not ------Instruct employees on proper use.

Emergency equipment -----Ensure required inspections are conducted

and repair as required.

readily available (eye wash stations, showers)

properly used

functioned improperly

Other causal factor: ___

Management Systems as a contributing factor

Failure by supervision todetect, anticipate or report hazardous condition	-Improve supervisor capability in hazard recognition and reporting procedures. Provide training.
Failure by supervision todetect or correct deviations from job procedures	-Review job safety analysis and job Increase supervisor monitoring. Correct deviations.
No supervisor/employee of hazards and job procedures for tasks performed infrequently	-Establish a procedure that requires a review of hazards and job procedures (preventative actions) for tasks performed infrequently.
Supervisor's responsibility and accountability inadequately defined and understood	Define and communicate supervisor responsibility and accountability. Check for understandability and acceptance.
Failure to initiate correctiveaction for known hazardous condition that contributed to this accident	rReview management safety policy and level of risk acceptance. Review procedure and responsibility to initiate and carry out corrective actions. Monitor.
Other causal factors:
